Re: Installation of Telephone System at Rylak and Gianos

Dear Russell:

Just wanted to drop you a quick note thanking you for the professional way that you and your staff handled the purchase and installation of the telephone system at Rylak and Gianos. As you know, we were previously dealing with AT & T and our previous phone system was through AT & T. We had quotes from AT & T for a new telephone system. Your quote was much more competitive and the service that we received from you was much more personal and customized to our needs. The installation of the system was on time and we were quickly up and running the next day. As you saw from being during here during the initial training session on the day after installation our phone volume is quite large and any interruption in phone system would have been devastating.

I would have no problem whatsoever recommending you to anyone for telephone systems. If any of your prospective customers needs a recommendation and would like to speak to me I would have no problem doing so.

Sincerely yours,
RYLAK AND GIANOS,

By
