To Whom It May Concern:

If your company is thinking of installing a new telephone system, look no further than Breninger Communications. This company is very knowledgeable and their customer service is first rate.

Our company started out 6 years ago with two telephones. Now we have a mega system that has ten lines, fourteen telephones and voice mail. Breninger Communications was with us every step of the way. They didn't try to sell us something that we didn't need but were able to predict the possible growth of our business and make suggestions that were not only within our budget but that could also expand with our company.

We found that our business relationship with Breninger Communications began after the sale. They were available for any hiccup that occurred and the numerous questions that our staff had regarding the operation of the system. Their patience and professionalism are second to none. I would strongly recommend using this company for any and all telecommunications and/or electronic equipment you may need.

Sincerely,

Maggie Rowe  
Vice President
